## **Bicycle Ride on World Environment Day**

Riding a bicycle is not only about your own mental and physical health it is also about the health of our planet. No petrol! No diesel! No harmful emissions! No carbon Dioxide! Less Noise! Hence cycling is the simplest and eco-friendly transportation. Our enthusiastic bicycle riders are frequently seen in the area around the Campus exploring the beautiful flora and fauna.

Apart from the normal Weekly fun rides the some of the impactful rides recently were World Environment Day when Our team of cyclists rode for awareness on 5th of June 2022 in Shimla. The ride was basically to advocate the cause of shunning single use plastic. The government order was to come in effect on July 1, but the lack of awareness is a strong hurdle in the implementation.

**Number of students participated: - 04**
