

February 01, 2022**Blood donation**

An urgent blood donation camp was organized on February 01, 2022, in MMU Sultanpur Solan. For this blood donation camp, a Google form was circulated, and, on this link, volunteers had to register. The university organized a bus for the volunteers from Shoolini University to the hospital at Sultanpur, Solan. As students reached there, they were given fruits as refreshments. After taking proper safety measures like giving volunteers polythene cover on the shoes as precaution to avoid covid before entering the blood donation hall the process started. The volunteers donated the blood for which they were given certificates of participation. Dr. Deepak from MMU appreciated the efforts of the volunteer and said that they were looking for many more such collaborations with Shoolini University.

Number of students participated: - 08**Volunteers donating blood at MMU**
