Healing Himalayas-Pradeep Sangwan

A Guru talk with Pradeep Sangwan who is the founder of Healing Himalayas was done in Ratan Tata Hall of Shoolini University. It was indeed an inspiring talk because for the first time Pradeep came and explained to the students how the Himalayas were being ravaged by the garbage and the trash that is being thrown by the tourists and the locals together. He explained to the students how he and his team are on a constant effort to keep cleaning the garbage that is left behind by the tourist etc. He emphasized on the need on stopping the use of plastic because it is creating a huge amount of damage to the environment. From this day onwards Shoolini University is deeply engaged with Healing Himalayas as several drives have been conducted with them together.

Number of students participated: - 250
