Subject: Re: Our discussions

Atul:

As far as the funds for the research lab and consultancy are concerned, I confirm my commitment for Rs 1 crore.

Can you give a timeline how the funds will be drawn. And, if possible, I would like to personally get involved in the process as well.

Regards

Raj Khosla

Subject: Our discussions

Dear Sir,

It was truly exciting and inspiring speaking you. I was truly humbled listening to some of the initiatives you have taken to help the underprivileged. Thank you for calling.

As, discussed I am submitting two proposals:

1. Student Scholarships:

We will be delighted to develop a scholarship programme for under-privileged students from the School you sponsor in Dehradun. To demonstrate our commitment to the cause, Shoolini University will match the amount of funding you decide - It costs approximately Rs. 2 lakhs an year per student including hostel fees. To make the scholarships sustainable, I suggest we create an interest bearing endowment that funds the programme for the long term. As an example, if you decide to fund 8 students (2 an year), at Rs 1 lakh/ year (half the total), we will need an endowment of appx 80 -100 lakhs, built over four years. My second suggestion is that we do not make it completely free – the students need to have some skin in the game – small yet significant for them. This will also ensure we expand the scholarships to more students for the same endowment. We will also add multiple free tuition fees Shoolini Scholarships to the cause.

2. Research Centre at Shoolini University:

As we discussed, Shoolini University has been working on several Govt. of India sponsored high impact research projects including several projects on water purification and anti cancer. Our research output is today higher than the IITs and leading Indian institutions. We also have over 180 patents for various research initiatives. To support these initiatives, we have high end equipment of over INR 20 crores in various labs of the university. As a trust we have invested over Rs. 100 crores to the research cause over the last 10 years since our inception.

I propose we build a high end, world class research centre that consolidates all our equipment and efforts and name it on anyone you desire eg. "The Raj Khosla Research Labs" or on your dad/ mom. To build a 5-6,000 sq ft quality and inspiring facility we will need appx 2.0 – 2.5 cr. We seek a donation of Rs. 100 lakhs from you - Shoolini University will match your donation. I will also personally contribute to this cause.

As next steps, I will appreciate your preliminary thoughts. Post that Dr Khosla, you and I should get together on a conference call or Skype and work out the details.

Truly look forward to hearing back. Avnee and I will also make a trip to Thailand soon.

Warmest Regards

Atul
