Manav Mandir visit

Student volunteers from Shoolini University went to Indian association of muscular dystrophy to volunteer and meet the children and parents who are suffering from muscular dystrophy. This was a first visit of many of our new volunteers who experienced meeting little children suffering from a disease which has no cure. They also met and interacted with the parents of these young kids who have to reconcile to the fact that muscular dystrophy cannot be cured, and its prognosis gets worse as time passes by. However, the Indian association of muscular dystrophy helps these young children and adults to cope with this problem and suggests many lifestyle changes which can help them lead a better life. Our students regaled their audience with singing, dancing and other fun games and came back to campus after adding a lot of smiles on the faces of the young patients.

Total number of students participated: - 24

A volunteer anchoring the cultural evening

Some girls dancing on the stage

Everyone at IAMD Centre enjoyed the show
